PUBLICATIONS Patrice LAURE

mise à jour le 2007-01-15

Publications acceptées et soumises dans des revues avec comité de lecture

A.30

Méthodes d'interaction fluide-structure pour la simulation multi-échelles des procédés de mélange
R. Valette, J. Bruchon, H. Digonnet, P. Laure, M. Leboeuf, L. Silva, B. Vergnes et T. Coupez
Mécanique et Industries **8**, 251-258 (2007).

A.29

Numerical methods for solid particles in particulate flow simulations
P. LAURE, G. BEAUME, O. BASSET, L. SILVA and T. COUPEZ
European Journal of Computational Mechanics **16**, 365-383 (2007).

A.28

Convective Linear Stability analysis of two-layer coextrusionflow for molten polymers
R. VALETTE, P. LAURE, Y. DEMAY and J.-F. AGASSANT
J. Non Newtonian Fluid Mechanics, **121**, 41-53 (2004).

A.27

Experimental Investigations of the development of Interfacial Instabilities in Two-Layer Coextrusion Dies
R. VALETTE, P. LAURE, Y. DEMAY and J.-F. AGASSANT
Int. Polym. Process., **XIX-2**, 118-128 (2004).

A.26

Investigation of the interfacial instabilities in the coextrusion flow of polyethylene and polystyren
R. VALETTE, P. LAURE, Y. DEMAY and J.-F. AGASSANT
Int. Polym. Process., **XVIII-2**, 171-178 (2003).

A.25

Convective instabilities in coextrusion process
R. VALETTE, P. LAURE, Y. DEMAY and A. FORTIN
Int. Polym. Process., **XVI-2**, 192-197 (2001).

A.24

Transition to spatio-temporal intermittency from interpenetrating spirals in Couette-Taylor system
I. MUTABAZI, A. GOHARZADEH and P. LAURE
in Physics of Rotating Fluids, editors : Christoph Egbers and Gerd Pfister, *Lect. Note in Physics*, Springer Verlag, 102-117 (2000).

A.23

Linear pulse structure and signalling in a film flow on an inclined plane
L. BREVDO, P. LAURE, F. DIAS and T.J. BRIDGES
JFM, **396**, 37-71 (1999).

A.22

Longwave stability of three-layer plane Poiseuille flow with an inner thin layer. Application to the coextrusion of polymers
S. SCOTTO and P. LAURE, *CRAS série II b* **325**, 201-206 (1998).

A.21

Linear stability of three-layer Poiseuille flow for Oldroyd-B fluids
S. SCOTTO and P. LAURE
J. Non-Newtonian Fluid Mech. **83**, 71-92 (1999).

A.20

Symmetry-breaking convective dynamos in spherical shells
I. BOSCH-VIVANCOS, P. CHOSSAT and P. LAURE
J. Nonlinear Science **9**, 169-196 (1999).

A.19

Convection en double diffusion dans une coque sphérique
P. BELTRAME, P. CHOSSAT et P. LAURE
CRAS série I **325**, 1049-1052 (1997).

A.18

Linear stability of multilayer plane Poiseuille flows of Oldroyd B fluid
P. LAURE, H. LE MEUR, Y. DEMAY, J.C. SAUT and S. SCOTTO
J. Non-Newtonian Fluid Mech. **71**, 1-23 (1997).

A.17

Non linear analysis of instability modes in the Taylor-Dean system
P. LAURE and I. MUTABAZI
Phys. Fluids A **6**, 3630-3642 (1994).

A.16

The influence of an axial mean flux on the Couette-Taylor problem
R. RAFFAÏ and P. LAURE
Eur. J. Mech. B/Fluids **12**, 277-288 (1993).

A.15

On stability of plane parallel advective flows in long horizontal layer
G.Z. GERSHUNI, P. LAURE, V.M. MYZNIKOV, B. ROUX and E.M. ZHUKHOVITSKY
Microgravity Quarterly **3**, 141-152 (1992).

A.14

Wave patterns in the small gap Couette-Taylor problem
Y. DEMAY, G. IOOSS and P. LAURE
Eur. J. Mech. B/Fluids **5**, 621-634 (1992).

A.13

Departures from Boussinesq approximation in the Rayleigh-Bénard convection
J. FRÖHLICH, P. LAURE and R. PEYRET
Phys. Fluids A **4**, 1355-1372 (1992).

A.12

Quasiperiodic drift flow in the Couette-Taylor problem
P. LAURE, J. MENCK and J. SCHEURLE
International Series of Numerical Mathematics **104**, 191-202 (1992).

A.11

Effect of eccentric cylinders on the primary bifurcations of the Couette-Taylor problem
R. RAFFAÏ and P. LAURE
CRAS série I **313**, 179-184 (1991).

A.10

Non linear study of the flow in a long rectangular cavity subjectedto thermocapillary effects
P. LAURE, B. ROUX and H. BEN HADID
Phys. Fluids A **2**, 516-524 (1990).

A.9

Thermocapillary effects on the stability of buoyancy-driven flows in shallow cavities
H. BEN HADID, B. ROUX and P. LAURE
PCH **11**, 625-644 (1989).

A.8

Numerical simulation of oscillatory convection in semiconductor melts
B. ROUX, H. BEN HADID and P. LAURE
J. Crystal Growth **97**, 201-216 (1989).

A.7

Linear and non linear study of the Hadley circulation in the case of infinite cavity
P. LAURE and B. ROUX
J. Crystal Growth **97**, 226-234 (1989).

A.6

Linear stability of compressed spherical gaz bubble in an incompressible viscous fluid
M. ROSSI, G. IOOSS and P. LAURE
Phys. Fluids A **1**, 915-923 (1989).

A.5

Hydrodynamical regimes in metallic melts subject to a horizontal temperature gradient
B. ROUX, H. BEN HADID and P. LAURE
Eur. J. Mech. B/ Fluids **8**, 375-396 (1989).

A.4

Synthèse des résultats obtenus par l'étude de stabilité des mouvements de convection dans une cavité horizontale de grande extension
P. LAURE et B. ROUX
CRAS série II **305**, 1137-1143 (1987).

A.3

Bifurcation secondaire de solutions quasi-périodiques pour le problème de Couette-Taylor, calcul effectif de la forme normale
P. LAURE
CRAS série I **305**, 493-496 (1987).

A.2

Symbolic computation and equation on the center manifold : application to the Couette-Taylor problem
P. LAURE and Y. DEMAY
Computers and Fluids **16**, 229-238 (1988).

A.1

Étude des mouvements de convection dans une cavité rectangulaire soumise à un gradient de température horizontal
P. LAURE
J. Méca. Théo. et Appl. **6**, 351-382 (1987).

Autres publications, actes de congrès et rapports

R.38

Numerical simulation of Polyester coextrusion: influence of thermal parameters and die geometry on interfacial instabilities
O. MAHDAOUI, J.-F. AGASSANT, P. LAURE, R. VALETTE and L. SILVA

Proceeding of ECCOMAS-10th ESAFORM conferences (Zaragoza, Spain, 18-20 April 2007).

R.37

Numerical modelling of concrete flow with rigid fibers
P. LAURE, L. SILVA, T. COUPEZ and F. TOUSSAINT
Proceeding of ECCOMAS-10th ESAFORM conferences (Zaragoza, Spain, 18-20 April 2007).

R.36

Simulations numériques directes à l'échelle microscopique
G. BEAUME, P. LAURE and T. COUPEZ
41ème colloque annuel du GFR (Cherbourg, 18-20 octobre 2006).

R.35

Injection moulding of short fibre reinforced thermoplastics: a comparison between experimental results and numerical simulation
M. VINCENT, A. REDJEB, P. LAURE and T. COUPEZ
proceeding of 12th European Conference on Composite Materials (ECCM12) (Biarritz, 29 aout - 1 septembre 2006).

R.34

Three dimensional numerical simulations of fiber orientation in injection molding
P. LAURE, R. REDJEB, L. SILVA, M. VINCENT and T. COUPEZ
Proceeding of 9th ESAFORM (Glasgow, 2006).

R.33

Simulations numériques d'écoulements de fluides complexes à l'échelle microscopique : un nouvel outil de rhéologie
G. BEAUME, P . LAURE et T. COUPEZ
40ème colloque annuel du GFR (Nice, 26-28 octobre 2005).

R.32

Les Méthodes Numériques Pour Les Écoulements De Fluides Chargés
G. BEAUME, P . LAURE et T. COUPEZ
1er Colloque Interaction Fluide-Structure GDR CNRS 2902 (Sophia-Antipolis, 26-27 septembre 2005).

R.31

Numerical simulation of fiber orientation in injection molding process
A. REDJEB, P. LAURE, L. SILVA, M. VINCENT and T. COUPEZ
PPS-21 (Leipzig, Germany, June 19-23 2005).

R.30

Simulations Numériques Directes de Suspension Chargée de Fibres
P. LAURE, A. MEGALLY et T. COUPEZ
17ème Congrès Français de Mécanique (Troyes, 29 août-2 septembre 2005).

R.29

Simulations Numériques de l'orientation de fibres en injection de thermoplastique renforcé
A. REDJEB, P. LAURE, L. SILVA, M. VINCENT et T. COUPEZ
17ème Congrès Français de Mécanique (Troyes, 29 ao\^ut-2 septembre 2005)

R.28

Collision Strategy for the Direct Simulation of Moving Fibers in Viscous Fluid
P. Laure, A. Megally and T. Coupez
Proceeding of Computational Methods for Coupled Problems in Science and Engineering (Santorini, Greece, May 25-27 2005).

R.27

A theoretical and experimental investigation of convective instabilities in a two-layer coextrusion flow of molten polymers
R. VALETTE, P. LAURE, Y. DEMAY and J.-F. AGASSANT
Proceeding of XIVth Int. Congr. on Rheology (Séoul, 2004).

R.26

Fiber motions in viscous fluid
A. MEGALLY, P. LAURE and Th. COUPEZ
Proceeding of Two-Phase flow modelling and experimentation (Pisa, 2004).

R.25

Manuel d'utilisation de DECLIC
P. LAURE
Rapport INLN, 2002.

R.24

Numerical Computation of Interfacial Instabilities for the Two-Layer Poiseuille Flow of Viscoelastic Fluids
P. LAURE, R. VALETTE, Y. DEMAY et A. FORTIN
Actes du 18th annual meeting of the Polymer Processing Society, Guimares, Portugal, mai 2002.

R.23

Interfacial Instabilities for two-layer Poiseuille flows
P. LAURE and A. FORTIN
rapport INLN, (2000).

R.22

Experimental and theoretical study of the interface instability of a two-layer coextrusion flow
R. VALETTE, P. LAURE, Y. DEMAY, J.-F. AGASSANT and B. VERGNES
Actes du 17th annual meeting of the Polymer Processing Society, Montréal, Canada, mai 2001.

R.21

Direct numerical simulation of interfacial waves of two-layer Poiseuille flow
P. LAURE, R. VALETTE, Y. DEMAY et A. FORTIN
Actes du 17th annual meeting of the Polymer Processing Society, Montréal, Canada, mai 2001.

R.20

Generation of magnetic field in the Couette-Taylor System
P. LAURE, P. CHOSSAT and F. DAVIAUD
Dynamo and Dynamics, a Mathematical Challenge, P. Chossat, D. Armbruster and I. Oprea (Eds), NATO ARW-series **26**, Kluwer, 17-24 (2001).

R.19

Etude de la stabilité du procédé de coextrusion
R. VALETTE, L. GRAVUS, P. LAURE, B. VERGNES, Y. DEMAY et J.-F. AGASSANT
in Surfaces, tribologie et formatage des matériaux Presses de l'École des Mines (2000).

R.18

Convectively unstable wave packets in a film flow on an inclined plane
L. BREVDO, T.J. BRIDGES, F. DIAS and P. LAURE
Proceeding of Two-Phase flow modelling and experimentation, G.P. Celeta, P. Di Marco and R.K. Shah (Editors), 1217-1224 (1999).

R.17

Stabilité aux grandes ondes de l'écoulement de Poiseuille constitué de deux couches séparées par une couche fine
S. SCOTTO, P. LAURE
33ème Colloque annuel du groupe français de Rhéologie, Les Cahiers de Rhéologie, Vol. XVI, 1, 71-75, 1998.

R.16
Linear Stability of two- and three layer Poiseuille Flows. Applications to the coextrusion of polymers
S. SCOTTO, P. LAURE, Y. DEMAY, L. GAVRUS, B. VERGNES, J.-F. AGASSANT, A. FORTIN
Proceeding of PPS-14 (Yokohama), 309-310 (1998).

R.15
Instabilité linéaire et non-linéaire en Hydrodynamique
P. LAURE
Habilitation à diriger les Recherches, Université de Nice, Février 1998.

R.14
Stabilité de l'écoulement Poiseuille multicouche de fluides Oldroyd-B. Application à la coextrusion de polymères
S. SCOTTO, P. LAURE et Y. DEMAY
Actes du 13ème congrès Français de Mécanique , Poitiers, vol. 1, 421- 424 (1997).

R.13
Dépouillement d'expériences de coextrusion. Comparaison théorie-expérience
M. ARNEY, B. ERNST, P. LAURE et Y. DEMAY
preprint INLN (1997).

R.12
Linear stability of multilayer plane Poiseuille flows of Oldroyd-B fluids
P. LAURE, H. LE MEUR, Y. DEMAY et J.C. SAUT
preprint, Université d'Orsay (1996).

R.11
The Couette Taylor problem in the small gap approximation
Y. DEMAY, G. IOOSS and P. LAURE
Ordered and Turbulent Patterns in Taylor-Couette Flow, Andereck C.D. and Hayot F. Ed., NATO ASI-series **297**, Plenum Press, 51-57 (1992).

R.10
Effets de l'excentrement des cylindres sur les premières bifurcations du problème de Couette-Taylor
R. RAFFAÏ et P. LAURE
Actes du 10ème congrès Français de Mécanique , Paris (1990), vol. 2, 369-372.

R.9
Marginal stability in a Rayleigh-Bénard problem with large departures from Boussinesq approximation
J. FRÖHLICH and P. LAURE
Eur. J. Mech. B/Fluids **10**, No 2-Suppl., 329 (1991).

R.8
Effects of the eccentricity on the primary instabilities in the Couette-Taylor problem
R. RAFFAÏ and P. LAURE
Eur. J. Mech. B/Fluids **10**, No 2-Suppl., 315 (1991).

R.7
Buoyancy and thermocapillary-driven flows in shallow open cavities
H. BEN HADID, B. ROUX and P. LAURE

Procceedings VIIth European Symposium on Materials and Fluid Sciences in Microgravity, Oxford, UK, 10-15 September 1989, ESA SP-295, January 1990.

R.6

Non linear study of the flow in a long rectangular cavity subjected to thermocapillary effects
P. LAURE, H. BEN HADID and B. ROUX
New trends in nonlinear dynamics and pattern-forming phenomena, Coullet P. and Huerre P. Eds., NATO ASI-series, Plenum Press, **237**, 286-289 (1990).

R.5

Surface tension-driven flows in horizontal liquid metal layers
H. BEN HADID, B. ROUX, P. LAURE, P. TISON, D. CAMEL and J.J. FAVIER
Adv. Space Res. **8**, 293-304 (1988).

R.4

Computational fluid dynamics and material processing (buoyancy and thermocapillary convections in melts during directional crystallization)
B. ROUX, H. BEN HADID and P. LAURE
Adv. Space Res. **8**, 225-249 (1988).

R.3

Shear driven flows in a long rectangular enclosure
B. ROUX, H. BEN HADID and P. LAURE
Adv. in Water Resources **11**, 15-20 (1988).

R.2

Calcul formel et génération de code Fortran pour le calcul des instabilités linéaires en symétrie sphérique
P. LAURE
Rapport DRET (1987).

R.1

Calcul effectif de bifurcations avec rupture de symétrie en hydrodynamique
P. LAURE
Thèse, Université de Nice, Février 1987.
